

SURANNE'S LIST Reviews

I've just finished reading Suranne's List by Margaret M Ford and my first thought is that someone should send a copy to Inland Revenue with the suggestion they use it as their Bible! It's listed as a local government exposé, and it certainly is. I found it a truly interesting read with a clever plot. Thoroughly enjoyable.

Amazon March 2012

Suranne's List is the fourth novel I've read by Margaret M Ford and you never quite know what to expect. Guaranteed in all her stories are great characters and frequent episodes of humour, which always motivates me to look out for her next title. In this one, she has carefully crafted a fictional story around a set of fraudulent schemes run by local government employees that I suspect may not be all that fictional. I recommend it to anyone interested in finding out what some of our civil servants may be up to.

Open Book Review April 2012

I was prompted to buy an ebook called Suranne's List when one reviewer on Amazon said the tax office should use it 'as their bible'. The author claims the story is entirely fictional, and it probably is, in which case Margaret Ford must have an incredible imagination – or she has been given access to a 'Deep Throat' in local government. I highly recommend it for a great and unusual read.
